Summary

Detail-oriented Software QA Engineer offering expertise in testing, automation, and improving software reliability. Experienced with C# applications, defect investigation, and supporting development through targeted testing and debugging. Proven ability to reduce manual regression testing and enhance efficiency through the development of Selenium-based automation frameworks. Currently expanding front-end development skills to complement QA and automation expertise for a holistic approach to software quality.

Professional Experience

Quality Assurance Specialist

July 2023 – December 2023

PrintScan Fingerprinting

New York, United States

- Performed manual testing across multiple environments to identify defects and ensure application stability and adherence to functional specifications.
- Investigated, reproduced, and meticulously documented bugs, collaborating closely with developers to facilitate efficient issue resolution within sprint cycles.
- Contributed to the C# codebase by implementing bug fixes and actively assisting with feature development tasks, demonstrating strong programming acumen.
- Collaborated with a senior developer to architect and build a robust Selenium-based regression testing framework in C#, resulting in a >40% quantifiable reduction in manual testing effort during sprint cycles.
- Developed custom automation tools for internal workflows, including the automation of appointment creation processes specifically for testing purposes, enhancing efficiency.
- Engineered with a database-driven location search system in C#, dynamically generating pages for all PrintScan locations, which significantly improved site navigation and SEO performance.
- Executed and validated detailed test cases to ensure that new and existing features met all defined functional and business requirements.

Guest Advocate

December 2021 – March 2023

Target

New York, United States

- Provided exceptional customer service, resolving inquiries and concerns efficiently to ensure positive guest experiences.
- Collaborated effectively with a diverse team to achieve departmental goals and maintain operational efficiency.
- Developed strong communication and problem-solving skills through direct customer interaction and conflict resolution.
- Managed high-volume service demands with resilience and adaptability, maintaining attention to detail under pressure.
